Education

CMR Engineering College
Bachelor of Technology in Computer Science and Engineering

CGPA: 9.26/10.0
July 2022 – July 2026

Technical Skills

- **Programming Languages:** C, Java.
- **Frontend:** HTML, CSS, Tailwind CSS, JavaScript, React.js, Redux.
- **Backend:** Node.js, Express.js.
- **Databases:** MySQL, MongoDB.
- **Cloud Platforms:** AWS (EC2, S3, CloudWatch).
- **Tools & Version Control:** Git, GitHub, Postman, Figma.

Professional Experience

SDE Intern — itjobxs.com (*MERN STACK*) **Jan 2024 – Apr 2024**

- Developed robust user verification and authentication systems, reducing fraudulent accounts by 90% and eliminating 80% fake bots, significantly enhancing platform security.
- Delivered an end-to-end e-commerce website using the MERN stack for a client, implementing key features that resulted in 70% increase in client efficiency.

UI/UX Design Intern — SoarX (Campus Code) (*Product Design*) **May 2024 – Nov 2024**

- Created low and high-fidelity wireframes to streamline the design process, ensuring alignment with user workflows and stakeholder expectations.
- Increased user engagement by 30% through responsive UI redesign across web and mobile platforms, enhancing overall accessibility.
- Delivered 10+ production-ready Figma prototypes, accelerating the developer handoff process and reducing design iteration cycles by 40%.

Projects

DevSync (*DaisyUI, MERN Stack, WebSockets*)

- Architected a secure authentication framework that mitigated over 100 MongoDB injection attempts.
- Implemented robust middleware for comprehensive error handling and API validation, reducing system crashes by 80% and significantly enhancing reliability.
- Enhanced database efficiency through compound indexing and query optimization, yielding a 60% decrease in query execution time.
- Deployed the application on AWS EC2 with auto-scaling capabilities and continuous monitoring via CloudWatch, ensuring an uptime of 99.9%.

Stream GPT (*Tailwind CSS, JavaScript, React, Redux Toolkit, Firebase, OpenAI API*)

- Integrated GPT-3.5 Turbo API to elevate search relevance by 40%, delivering more precise and user-tailored recommendations.
- Established secure Firebase Authentication with JWT-based authorization, cutting authentication errors by 25% and fortifying data protection.
- Crafted a scalable, multilingual interface by applying internationalization (i18n) standards, enhancing accessibility and driving a 40% increase in user engagement.

DevTube (*Tailwind CSS, JavaScript, React, Redux, YouTube API*)

- Accelerated page load speeds by 35% through the integration of infinite scrolling combined with debouncing techniques (100ms threshold).
- Minimized API response latency by 50% via advanced Redux caching strategies (reducing from 200ms to 100ms).
- Built a multi-level nested commenting system to organize user discussions and improve platform usability.

Certifications & Achievements

- Completed IBM Frontend Web Development Internship (2024) via IBM-SkillsBuild, gaining practical expertise in responsive web application development.
- Awarded Smart Coder Gold Badge from SmartInterview, ranking in the top 10% for excellence in coding and data structures.
- Secured Top 30 position out of 500+ teams in a city-wide coding hackathon organized by JNTUH, competing across multiple Hyderabad colleges.
